Listening

Listen to Rose Pietralska speaking about virtualization. After, answer the questions:

1. What does virtualization refer to?
2. What companies lead this kind of virtualization?
3. How is the experience of running old apps in virtualization?
4. What about test software in virtualization?
5. Is it easy or difficult to back up with virtualization? Why?
6. How many differences are there working with a Citrix XenDesktop on your Windows server from your client compared with running the operating system and applications locally?
